Skills

Languages: JavaScript, TypeScript, C/C++, Java

Technologies & Tools: Git, AWS, DynamoDB, S3, SQS, Lambda, GCP, ReactJS, VueJs, Node.js, Express.js, Tailwind, MongoDB, MySQL, REST APIs, SST

Work Experience

Cloudify 🌐, [Remote/Copenhagen]

Nov 2020 - Present

Lead Software Development Engineer

- Led and managed the Custom Automation team, successfully delivering 50+ client projects across diverse categories such as Payment Gateways, Accounting Systems, CRM, ERP, Shipping, and more.
- Spearheaded the migration of client integrations from Autocode to AWS Platform within a record time of one week, resulting in savings of over \$15K in Autocode operating costs.
- Optimized the client onboarding process, making it faster, more standardized, and smoother, ensuring effective integration, higher satisfaction, and reduced time to value.
- Facilitated sprints, conducted daily stand-ups, and ensured clear communication among all team members.
- Managed the release cycles of all the projects in the Custom Automation team ensuring timely delivery of the projects.
- JavaScript, TypeScript, AWS, SST, Elasticsearch, MySQL, DynamoDB, S3, SQS, Lambda, GCP, ORM, VueJs, Zapier, Make(Integromat), Firebase, Bootstrap, HubSpot, Pipedrive, Stripe, Chargebee and many other apps.

Project Work

- **s360 Invoicing Integration:** Developed an integration between HubSpot CRM, Visma, e-conomic and BigQ, automating end-to-end invoicing with eight complex payment schedules, processing 4K deals daily.
- **Noerstogo:** Developed end-to-end restaurant automation, integrating Lightspeed POS, Nexi Nets, Nets terminal, MobilePay, and e-conomic, along with a Retool-based overview app, reducing manual work and boosting sales.
- **Generic Polling System:** Developed a GCP-based polling system for 10+ apps with dynamic filtering, enabling event listening for apps without webhooks, streamlining client onboarding, and boosting sales.
- **Werd Amazon Integration:** Developed an integration between Amazon Seller Central and Microsoft Business Central, automating invoicing across European marketplaces and managing delayed Amazon fees (FBA, FBM, packing) to ensure accurate invoicing.

Education

GGSIPU Delhi

Jun 2017 - July 2021

B.Tech. in Computer Science and Engineering

CGPA: 8.5/10

Relevant Coursework: Object Oriented Programming, Databases, Discrete Maths, Data Structures and Algorithms, Operating Systems, Computer Networks, Artificial Intelligence, Advance Data Structures and Algorithms

Publications

- Amit Khaparde, Akshat Kumar, Mohit Kumar and Suyash Gupta. **"Multi-Lingual Code-Mixed Machine Translation System"**. **AIP Conference Proceeding · 2424, 070002 (2022)**. [Link to the paper](#)
